**SUBJECT: Comment Letter – November 4, 2004 Workshop: Item Number 6:
Consideration of a resolution requiring SWRCB staff, in coordination
with the Sanitary Sewer Overflow Guidance Committee, to develop a
proposed Sewer Overflow Reduction Program by November 2005**

Dear Chairman Baggett and Members of the Board:

The Central Valley Clean Water Association (CVCWA) is pleased to provide comments regarding the proposed Sewer Overflow Reduction Program. CVCWA is an organization of wastewater agencies that are interested in balanced regulatory developments in the field of water quality management. CVCWA's members provide wastewater collection, treatment and water recycling services to residents and businesses throughout the Central Valley region.

The Central Valley Clean Water Association has a member actively participating on your SSO Guidance Committee and we have several other members on a number of the sub-committees that were also formed. We have been following the developments of the guidance committee and would like to offer our support to the subject resolution. CVCWA supports the development of a Sanitary Sewer Overflow Reduction Program through the continued efforts of the guidance committee and all of the stakeholders that are involved.

Sincerely,

Warren Tellefson
Executive Officer
